

Mr. Manto is CEO of Instant Access Networks, LLC a consulting and R&D firm that produced independently tested solutions for EMP protected micro-grids, control and data systems, networks and mobile command centers. He received six patents in telecommunications, computer mass storage and EMP protection and assisted other entrepreneurs and investors with their intellectual property strategies. Developed valuation methodology

accepted by the U.S. DOD, countries, and companies participating in industrial defense conversion. Facilitated due diligence of over 200 deals at roughly \$10M each, managed a venture capital service, a revolving loan fund, an economic development corporation, a computer mass storage manufacturer, and broadband CLEC.

Mr. Manto has also founded and leads InfraGard National's EMP SIG that produced four annual conferences, their proceedings and a Triple Threat Power Grid Exercise for continuity and disaster planners. He received his B.A. and M.A. from the University of IL at Urbana/Champaign.
